

BEAR SAFETY

A FED BEAR IS A DEAD BEAR

Feeding bears will only encourage them to seek food from humans. Bears seeking food from and around humans, can further increase the chance of an attack, and in turn the bear being euthanized.

STAY AWAY

Do NOT attempt to get close to bears, whether adult or cub. Bears protect cubs and themselves. By attempting to get close to them, you are putting yourself, others, and the bear at risk!

SECURE FOOD AND TRASH

Do NOT leave food outside! Also, make sure that all trash is secure and in the correct bins. Leaving food and trash out can lure the bears in.

LOCK YOUR VEHICLE

Bears are extremely smart animals and when vehicles are left unlocked, they can get in. Please do not leave vehicles unlocked and/or with food inside.
